

Office of Housing Services
National University of Singapore

March 16, 2020

Dear Office of Housing Services,

I am writing to you to support application of KoWei Tseng for the on campus accommodation. KoWei is currently enrolled in the PhD program at the Centre for Quantum Technologies, National University of Singapore and working on an experimental research project in quantum physics under my supervision.

Having the Kowei living within a walking distance from the lab is not merely a convenience for the student who can spend less time on travels and more times working on his project. It also helps our research group. He is able to quickly respond to emergencies in the lab, like an equipment breakdowns or air-con system failures which can seriously damage the experimental setup if left unattended for a long time, or check experiments that are running overnight. Such tasks are essential for the lab, but are nearly impossible for other group members who leave far away from campus and spend long time for commuting. Therefore I enthusiastically support KoWei's request for on-campus accommodation.

Sincerely yours,
Dzmitry Matsukevich
